# QCheck-In

## Trouble-free Active Reception

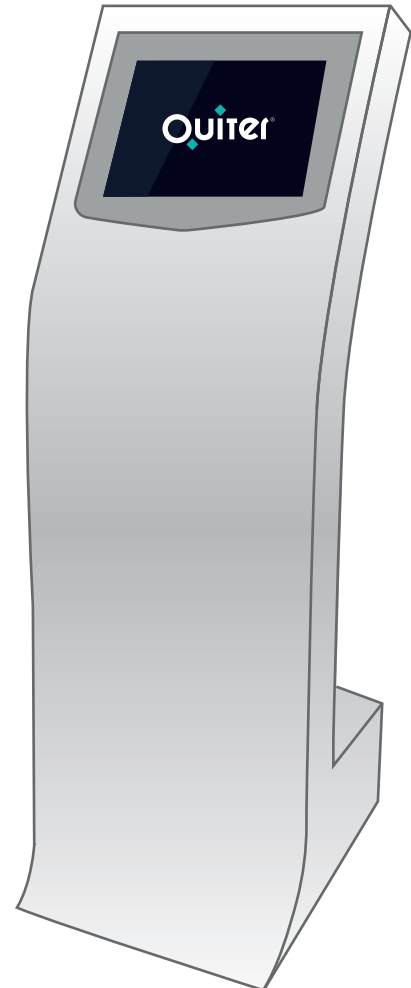

Auto vehicle reception with  
or without appointment

### WHAT IS QCheckin?

This is an independent Web solution, which allows dealer clients to check in their vehicles in the garage automatically, without intervention of the service assistant.

Obviously, this solution can be fully integrated with Quiter AutoWeb, and also with other DMS requiring this service. It allows auto reception of vehicles with or without appointment in the garage, but if there is no appointment, the client will be notified that the work cannot be guaranteed on the same day and that a service assistant will contact him/her to confirm.

In addition to presenting the work requested in the appointment (if any), it allows the client to select other added repair work from a predefined list, or else leave additional remarks. At the end of the process, the client signs on the screen, confirming the requested repair work, and the deposit slip of the vehicle will be sent via e-mail.

### Features / Advantages of QCheck-In:

Fully web-based, independent solution, compatible with any DMS

Allows clients to check-in their own vehicles, without need to wait

Does not require the intervention of dealer staff, leaving them free to conduct other jobs. Does not require appointment

Furthermore, it allows the client to select, in addition to the repair jobs indicated in the appointment, other additional repair work from a predefined list

The client signs on screen to confirm the repair work to be carried out

The vehicle deposit slip is sent to the client via e-mail
