- **MANAGEMENT ALERTS**
- **AUTOMATIC MULTI-POSTING**
(coches.net, Autoocasión, Autoscout24...)

What is VOactiVO?

Efficient Used Car management, fully integrated in the Quiter AutoWeb DMS.

VOactiVO helps Used Car Managers in the the management and control of their department, provides all the required elements for decision-making, controls each phase of the used vehicles management cycle and provides sales teams with a sales terminal with all the information required to improve performance. For this,

Quiter has entered into co-operation agreements with the main stakeholders of the sector:

Some of the main features of **VOactiVO** are:

- Full and precise identification of the vehicle, technical description, standard and optional equipment through JATO
- Full image management
- Price and offer radar Autobiz
- Management alerts: by days in stock, sales prices without variation, absence of images
- Centralised stock control of vehicles in real time
- Automatic upload to professional used car websites
- Automatic upload of vehicles to the distributor website and, if applicable, to the brand website
- Automatic data dispatch to Carfax for vehicle records.
